

I do not think that any proposal should be implemented to lessen the telephone privacy law in IN. It has been wonderful for our family. We used to receive at least 10 calls in the evening and during the day it is horrible. I didn't want to answer the phone. It would interrupt my time with the children, dinner time, nap time and or family time. I think this is a very important law and would be a great injustice to change it. We need to have our privacy protected.
